License

Lua is free software: it can be used for any purpose, including commercial purposes, at absolutely no cost. No paperwork, no royalties, no GNU-like "copyleft" restrictions, either. Just download it and use it. Lua is certified Open Source software. Its licenses are compatible with GPL. Lua is not in the public domain and PUC-Rio keeps its copyright. The legal details are below.

License for Lua 5.0 and later versions:
Since Lua 5.0, Lua is licensed under the terms of the MIT license reproduced here.

The spirit of both licenses is that you are free to use Lua for any purpose at no cost without having to ask us. The only requirement is that if you do use Lua, then you should give us credit by including the appropriate copyright notice somewhere in your product or its documentation. A nice, but optional, way to give us further credit is to include a Lua logo and a link to our site in a web page for your product.

The Lua language is entirely designed, implemented, and maintained by a team at PUC-Rio in Brazil. The implementation is not derived from licensed software.
